Highlights

A new document vector representation using word2vec and latent dirichlet allocation

Halil İbrahim Çelenli,Sevinç İlhan Omurca,Murat Can Ganiz

- We present TopWord2vec, a combination of Word2vec and LDA models

- TopWord2vec model gives better results than the Doc2vec model.

- TopWord2vec model gives good results in tweets and news datasets.

- TopWord2vec model improves the classification results and reduces the complexity of the results.
